

I hear the low power FM will interfere with, or shut down FM translators.

I listen to a FM translator station (K-LOVE) every day. On the road or in my workshop it is usually K-LOVE on the radio.

A national station like K-LOVE brings a better thought out, polished program.

I do listen to local stations, but it is the music and programs that are sold nation-wide that I like on these stations also.

A lot of people in Cincinnati listen to K-LOVE, it would be missed.
